A Data Backup and Disaster Recovery Solution (BDR) should be a three tiered strategy. And above all-it must be affordable to the SMB (Small/Medium sized Business) Market.

Prices start at \$169 per month. ***

The BSU BDR solution includes, but is not limited to, the following:

Local Backup

- Uses NAS Device for Backup and Recovery (no more unreliable, slow tapes)
- Backup Software is included
- All data is encrypted with AES-256 (for your security and compliance needs)
- Completely Automated (Nothing to do for the customer)
- Restore is intuitive and very fast (simply copy and paste for most files and email)
- Near Real time. Changed data can be backed up as often as every 15 minutes
- Scalable - can accommodate your company's growth

Off Site Backup

- A complete image of servers is housed in 2 geographically diverse data centers
- Data is encrypted (256 bit AES)
- Transfer is Secure (secure 256 bit tunnel)
- It's all automated. No customer participation necessary

Server Recovery Capability

- Downtime costs money. Decrease downtime from days to less than an hour
- Stand By Server Capability (Any or all of your servers recovered within 30 minutes)
- P2V (Physical to Virtual) NAS Device acts as virtual server while continuing to complete backups
- V2P (Virtual to Physical) When down server is repaired, current image can be restored back to server quickly and easily
- Bare Metal Recovery - In the event the mal-functioning server needs to be replaced it can be to a dissimilar device making recovery easier, quicker and less expensive.

All costs - frequent on site backups, on site virtual server, remote storage, disaster recovery in the event of disaster and 24x7 management of the entire process are bundled at a price that is comparable to the overall cost of buying and managing tape backup.

***** For BSU Contract Customers. Non Contract Customer pricing starts at \$199 per month.**
